

New Format

Students will learn the key differences between the digital and paper formats. This includes how the tests are structured, what tools are available, and how navigation has changed.

Test Subjects

We will offer a comprehensive examination of each of the digital SAT test subject. Students will gain insights into the various question types and effective strategies for test preparation

Strategy

In addition to learning effective ways to study for the digital SAT, students will also learn how to implement test taking strategies that will aid in question timing and accuracy.

Desmos

Demos, the calculator available to all students during the math section of the digital SAT, will be covered. We will provide instruction on its proper use and how to maximize its capabilities

Bluebook

Students will learn how to install College Board's software onto their personal devices and engage in a live practice session with the workshop facilitator.

Accommodations

Students will become knowledgeable about how accommodations are implemented into the digital format. We will also cover how to request accommodations and the different types offered by College Board.

FREE DIGITAL SAT WORKSHOP

November 12th, 3pm-5pm
